NOTE.—Those publications of the Department of Agriculture which are for sale, except those of the Weather Bureau, will hereafter be supplied by the Superintendent of Documents. The Department has no list to which all its publications are sent. It issues a monthly list of publications, which is mailed to all applicants, enabling them to select such reports and bulletins as interest them. The serial publications of the Department are not intended for general distribution. Requests for them are referred to the divisions from which they are issued, and instructions are then sent as to how the publications may be regularly secured.

General Note

AUTHORITY FOR PUBLISHING THE CATALOGUE

This Monthly Catalogue is issued in accordance with the provisions of section 69 of the act providing for the public printing and binding and the distribution of public documents, approved January 12, 1895, which is as follows:

"SEC. 69. A catalogue of Government publications shall be prepared by the Superintendent of Documents on the first day of each month, which shall show the documents printed during the preceding month, where obtainable, and the price thereof. Two thousand copies of such catalogue shall be printed in pamphlet form for distribution."

There is no direction as to who shall make the distribution, nor to whom it shall be made. Thus far the Superintendent of Documents has exercised his own discretion in the premises. In pursuance of this discretion copies of each issue have been sent to the Senators, Representatives, and Delegates of the Fifty-fourth Congress, to the designated depository libraries, to those Government Departments, bureaus, and offices that issue public documents, to the officers of the Engineer Corps, U. S. A. (by request of the Chief of the Corps), and, finally, to those citizens who have asked for them. No arbitrary list of names of people who have expressed no interest in public documents has been made up. Only those unofficial citizens who were known to want the Catalogue have been supplied with it. By pursuing this course the small edition has thus far been saved from entire exhaustion, and it is still possible to send all the numbers except the first (Jan. 1895) free of charge to those who ask for them. It is probable, however, that it will soon be found necessary to adopt some more restrictive rule than that of "first come, first served," which has thus far been followed. More than 900 requests for the regular receipt of the Catalogue have been received from every part of this country and from several foreign countries, and every mail brings additional requests.

SALES BY THE SUPERINTENDENT OF DOCUMENTS

Section 61 of the act hereinbefore quoted provides as follows:

"The Superintendent of Documents is hereby authorized to sell at cost any public document in his charge, the distribution of which is not herein specifically directed, said cost to be estimated by the Public Printer and based upon printing from stereotyped plates; but only one copy of any document shall be sold to the same person, excepting libraries or schools by which additional copies are desired for separate departments thereof, and Members of Congress; and whenever any officer of the Government having in his charge documents published for sale shall desire to be relieved of the same, he is hereby authorized to turn them over to the Superintendent of Documents, who shall receive and sell them under the provisions of this section."

In accordance with the foregoing provisions, prices are fixed on the documents named in the Catalogue. In those cases where publications are offered for sale by the Departments issuing them, and price lists have been issued, those prices have been adopted here. In other cases the prices have been computed on the basis fixed in the law as above quoted. Except as otherwise stated in the body of the Catalogue, these computed prices call for paper or cloth covers, and a corresponding increase will be made for books bound in leather or half leather. The cost of paper covers is about 1c. per volume; of cloth cases, from 10c. to 30c. per volume; of full sheep binding, from 75c. to $1.15 per volume for octavos and $1.50 for quartos; of half russia or half turkey, $1.00 per volume.

WHERE DOCUMENTS ARE OBTAINABLE

It is the apparent intention of the new printing law (approved January 12, 1895) that the sales of public documents shall ultimately be concentrated mainly if not wholly in the office of the Superintendent of Documents. The provisions that 500 copies of each of the various departmental publications of every kind, as well as of the numbered Congressional documents, shall be sent to him (sec. 58); that all the accumulated documents in the Departments not needed for official use be sent to him now and annually (sec. 67); that any public officer having documents for sale may turn them over to him (sec. 61);—all point to such an intention. But thus far the law has been only partially operative. No public officer has sufficiently desired to be relieved of the sale of books to induce him to turn them over to this office. The collection of the accumulations from the Departments is not yet completed. The decision whether 500 additional departmental publications shall be printed for this office or 500 shall be deducted from the departmental editions has only recently been made. Consequently many of the current documents noted in the Monthly Catalogue can not be supplied by this office, while of the older documents, of which many thousands are here on sale, no catalogue can be furnished. Thus the selling function of the office of the Superintendent of Documents is comparatively undeveloped. But its development is progressing steadily, if not rapidly, and in the fullness of time all the results contemplated in the passage of the law by which this office was created may be realized.

The arrangements for disposing of public documents which existed before the passage of the new law are still in operation. They are extremely varied, but it is believed that all their important features are mentioned somewhere in this catalogue.

CONGRESSIONAL QUOTAS

Senators and Representatives in Congress have allotments, varying in number, of nearly all kinds of Government publications, which are distributed on their order from the Senate and House folding and document rooms. Documents can often be obtained more promptly and cheaply by application to Members of Congress than to the Departments.

SMITHSONIAN INSTITUTION

In its latest published catalogue and price list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution consist of Contributions to Knowledge, Miscellaneous Collections, and annual reports. No sets of these are for sale. The edition of volumes of Contributions and Collections is limited, and is distributed to designated public libraries and to learned institutions in this country and abroad. A small edition of some of the papers in the above publications is printed for sale or exchange. Those at present available are enumerated in the accompanying list. For reports of the Institution or of the National Museum application should be made to Members of Congress. For reports, etc., of the Bureau of Ethnology application should be

made to Members of Congress or to the Director of the Bureau." The "accompanying list" contains 479 titles, of which 222 are priced at from 2c. to $7.50 each. The annual report is the only Smithsonian publication that is a public document. All the others are paid for from the private funds of the Institution.

GOVERNMENT PRINTING OFFICE

The Government Printing Office sells the Monthly Statements of Finance, Commerce, and Immigration, compiled by the Bureau of Statistics of the Department of the Treasury; the Congressional Record, from the beginning of the Fiftieth Congress to date; the set of State Constitutions and Colonial Charters; Poore's Descriptive Catalogue of Government Publications; Reports of the Fish Commission, 1879–1887; the Reports on the Paris Exposition; the Catalogue of the Library of the Surgeon-General's Office; the Polaris Arctic Expedition; Hall's Arctic Expedition; Treaties and Conventions between the United States and other Powers, 1776–1887; Second and Third Annual Reports of the Geological Survey; Fishing Industries of the United States, five volumes; Report of Silver Commission, 1876; International Monetary Conference, 1881; and United States Infantry and Cavalry Drill Regulations.

HOW TO REMIT

Remittances to the Public Printer and the Superintendent of Documents should be made always by postal money order. The Geological Survey and the War Records Office will receive currency as well as postal orders if the exact amount be sent. The State Department will receive drafts on New York or Washington banks, as well as money orders or currency. None of the Departments or Bureaus will receive individual checks or postage stamps in payment for books.

All the Government offices which have books for sale issue price lists, which will be sent free to all applicants. The prices charged are never more than cost and 10 per cent added, and frequently much less than that.

All public documents, from whatever Department or Bureau they may be bought, will be forwarded to the purchaser free of postage.
